

MiPSE Parent Portal

MiPSE is the county-wide special programs software that is used to create and review IEPs, behavior plans, health plans, 504 plans, and more. The MiPSE parent portal provides parent(s)/guardian(s) the ability to see current and past finalized documents for their student.

If your student has an IEP, 504 plan or Plan of Care, you can request a MiPSE Parent Portal account by completing the request form linked below. You will receive an email with your login information within several school days of your request.

Once you have logged in for the first time using your temporary password, MiPSE will prompt you to create a new password. After creating your personal password, you will have access to your student's finalized documents in MiPSE. Don't forget to save your login information for future use.

If you forget your password and enter the wrong password 4 times, MiPSE will prompt you to reset your password. Select the "Forgot password?" option, and a new temporary password will be sent to your email. Follow the prompts to reset your password.

Any questions can be directed to the Special Education Office, (616) 987-2516.
